LiteHouse
CREATIVE LIGHTING TECHNOLOGY

Introducing
SPLASH-LITE
THE ILLUMINATED SPLASHBACK

Create a beautiful feature within your home with **Splash-Lite**, the illuminated glass splashback. **Splash-Lite** combines cutting edge technology and contemporary styling to produce an outstanding product for your home.

Produced using state of the art patented LED technology, combined with a unique array of glass options (from stunning recycled glass to the beautiful Organics range) to create the perfect feature piece within your kitchen. Available at individual sizes up to 3 metres by 1.2 metres, we can custom craft a bespoke splashback to suit your environment.

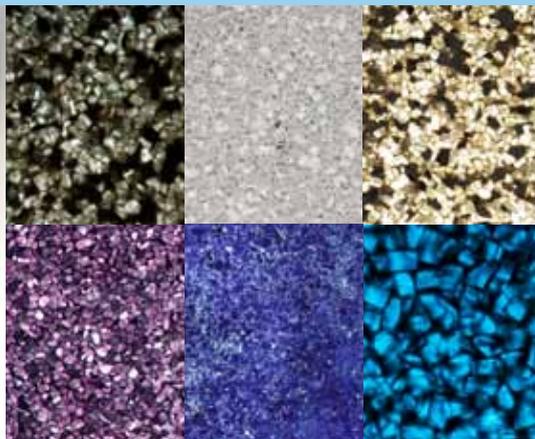

THE LIGHT The light source is the **Litehouse LED panel** which emits a bright, even output of light across the entire surface of the image. Edge lit with highly efficient LED's, the light travels from the edges of the panel along laser engraved channels etched into the optical grade acrylic.

This patented technology allows the panel to be brightly illuminated across its entire surface without dark spots. The use of LED technology provides a highly efficient light source, with very low power consumption and a life span of 50000 hours.

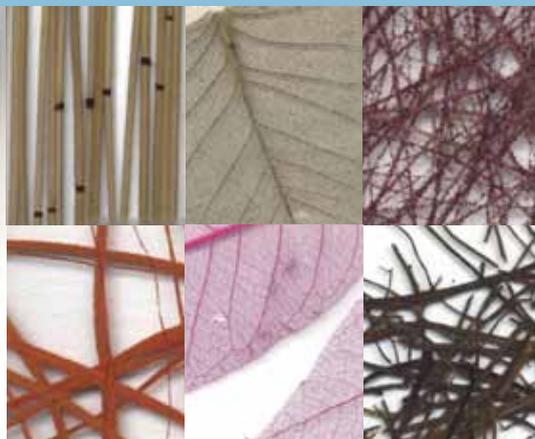

THE GLASS

We offer a wide variety of glass options giving you the ideal finish for your home. The three ranges that we supply are **Recycled**, **Organics** and **Imagery**.

Recycled

Made with up to 93% recycled materials, our recycled glass offers a stunning and individual eco-friendly surface material, which comes to life when illuminated.

Organics

A beautiful collection of organic substances such as decorative grasses, autumn leaves and reeds, perfectly encapsulated within a resin, provide a beautiful natural backdrop within your home.

Imagery

Offering you the most individual option possible. Providing us with an image to be illuminated within Splash-Lite, you can have the most bespoke product available.

Alternatively, if you wish to have a more simple finish then we can offer a range of single colour illuminated panels.

The Surround

The splash back is encased within a premium 25 mm seamless folded aluminium frame, powder coated to a choice of finishes. This provides the perfect unobtrusive surround.
